- **Environmentally Friendly .**
Noval Safety Copper free silver mirror use the new manufacturing process is more Environment friendly at it excludes the use of copper and lead. Polluting waste products are considerably reduced during manufacture and downstream processing stage. The products is easier to recycle.

Advantages

Contemporary colors

Noval color lacquered glass combines the attractive appearance of the lacquer with the clarity of glass. There are ten shades in the range: five light colour, contrasting with five deep colors, including black.

The stylish, radiant colors of Noval color lacquered glass co-ordinate well with natural materials (wood ,metal , stone etc).

Resistance to moisture

The composition of the lacquer used in Noval color lacquered glass enables the glass, in all colours, to be used in damp and humid rooms such as kitchens and bathrooms, without additional protective backing.

Durability

The lacquer is applied to the reverse side of the glass so is protected from damage and ensures that the colour are durable and bright

- Noval safety mirror – Ultra Clear (Low-iron) Silver Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Colored Silver Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Clear Copper Free Silver Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Ultra Clear (Low-iron) Copper Free Silver Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Colored Copper Free Silver Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Clear Aluminum Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Ultra Clear (Low-iron) Aluminum Safety Mirror (CAT-I & CAT-II)
- Noval safety mirror – Colored Aluminum Safety Mirror (CAT-I & CAT-II)
- Color : bronze ,grey ,green, blue, pink, yellow ,black ,golden etc
- Thickness: 3,4,5,6 mm
- Back paint color :Grey , Milk-white, Green, Dark blue
- Size : Customer size available
- Regular size : 1220 X 2440mm (48” x 96”)
- Max size : 1830 x 2440mm (72” x 96”)

Safety Mirror's Production (CAT- I)

Safety Mirror (CAT- II)

4mm clear silver mirror with woven safety film

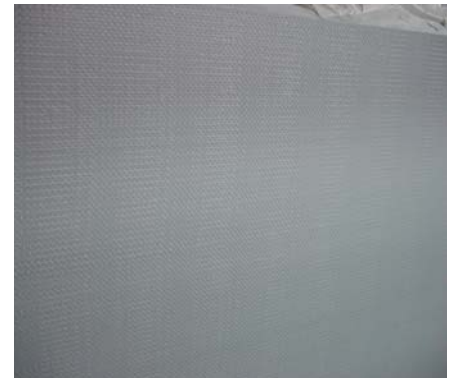

Safety lacquered glass

Noval safety lacquered is a lacquered safety glass. A special safety film is applied to the reverse side of the lacquered glass. If the glass is broken the film holds the fragments of glass in place, thus reducing the risk of injury.

Note

Despite every care taken with the product, and strict manufacturing controls, there may be slight variants in shade between two production runs.
